Strickler Farms LLC
Draft Permit to Operate Renewal

General overview of the farm

Strickler Farms LLC is located at 7600 Strickler Road, Amanda, OH, 43102 which is in Fairfield County, Clearcreek Township, situated in the Hocking Watershed. The facility is owned and operated by Strickler Farms LLC of which Neal and Theresa Strickler are members. The permitted design capacity at the facility is 3,500 swine weighing 55 pounds or more housed in 3 finishing barns and 1,000 swine weighing less than 50 pounds housed in one nursery barn. One finishing barn is a deep pit structure that provides greater than one year of storage and the other 3 barns are shallow pits that drain into a manure storage pond that provides 313 days of storage. This draft Permit to Operate is a renewal for the previously issued Permit to Operate, which was valid for a period of 5 years.

Overview of Draft Permit to Operate

Within the draft Permit to Operate (PTO), a complete Manure Management Plan is provided, which outlines inspections and monitoring that must be completed by the facility. The estimated manure production for the entire facility would be 1.8 million gallons annually, which would be applied on 1,620 acres of crop land as a replacement for commercial, synthetic fertilizer sources.

An Insect and Rodent Control Plan is included to minimize the presence and negative effects of insects and rodents. The plan includes methods to control flies, beetles and mice. The plan identifies requirements for regular inspections throughout the buildings for flies, as well as daily water leak inspections. The results of regular inspections are used to determine if the facility is required to perform treatment for insect or rodents based on the criteria set forth in the permit.

A Mortality Management Plan is required for disposal of dead livestock. Approved methods of disposal are burying, landfiling, burning, rendering and composting. Strickler Farms LLC, uses composting as the primary method of mortality disposal.

An Emergency Response Plan is required to ensure accidents or emergencies are handled quickly and efficiently to maintain the safety of the environment, wildlife and water supplies. In case of an emergency or accident, the names and phone numbers of contact personnel and equipment are listed in the permit.

Finally, an Operating Record is included that provides all forms and information that must be maintained by the facility to demonstrate compliance with ODA's rules and the permit. These records include inspection of the manure storage structures, manure characterization, land application, insect and rodent control, distribution and utilization of manure, and mortality management. The facility and these records are inspected by the Ohio Department of Agriculture to ensure compliance.

PUBLIC NOTICE
Ohio Department of Agriculture

Date of Issue of Public Notice: January 20, 2014

Strickler Farms, LLC.
7770 Strickler Road
Amanda, Ohio 43102

In accordance with OAC rule 901:10-6-01, public notice is hereby given that the Ohio Department of Agriculture (ODA) is accepting comments on a draft Permit to Operate for Strickler Farms, LLC, located in Fairfield County, Clearcreek Township, in the Hocking Watershed. If a final PTO is issued it would be valid for five-years.

Copies of the Strickler Farms, LLC draft permit can be reviewed and/or copies made at the ODA Livestock Environmental Permitting Program (LEPP) office at: A.B. Graham Building, 8995 East Main Street, Reynoldsburg, Ohio 43068, (614) 387-0470.

Any person may submit written comments and/or request a public meeting on the draft PTO. A request for a public meeting must be in writing and shall state the nature of the issues proposed to be raised at the public meeting. Comments and/or public meeting requests must be received by ODA LEPP office no later than 5 p.m. on February 19, 2014. Comments received after this date will not be considered. A public meeting will be held when required by OAC 901:10-6-04(C) and may be held where authorized by OAC 901:10-6-01(D). Persons have a right to provide a written or oral statement for the record at the public meeting, if a meeting is scheduled.

Oberholtzer Hog Corporation
Draft Permit to Operate

General overview of the farm

Oberholtzer Hog Corporation is comprised of two existing swine operations at 1053 Township Road 1806, Ashland, Ohio. The two existing operations are planning to be combined into one operation with the draft Permit to Operate to simplify management and bring the entire operation under the jurisdiction of the ODA. The facility is situated in Ashland County, Vermillion Township, in the Mohican Watershed. The facility is owned by Oberholtzer Hog Corporation and will be operated by Kenneth and Nancy Oberholtzer, of Ashland, Ohio.

General overview of the draft Permit to Operate

Within the draft Permit to Operate (PTO), a manure management plan is provided which outlines different inspections and monitoring activities that must be completed. Approximately 5.2 million gallons of liquid manure and 333 tons of mortality compost material will be land applied annually. All of the compost material and the liquid manure will be land applied on approximately 1,123 acres that are controlled by Oberholtzer Hog Corporation. The manure will be a replacement for commercial fertilizer on a typical corn, soybean and wheat rotation.

A detailed Insect and Rodent Control Plan is required to minimize the presence and negative effects of insects and rodents. The plan details which types of pests could potentially cause problems and how the facility will prevent those problems from occurring. The plan explains what preventative measures and treatments are available and how and when they might be employed. Details regarding the Insect and Rodent Control Plan can be found in the draft PTO.

A Mortality Management Plan is required for the disposal of dead livestock. Approved methods of disposal are burying, landfilling, burning, rendering and composting. Oberholtzer Hog Corporation plans to continue to use mortality composting.

An Emergency Response Plan is required to ensure that emergencies are handled quickly and efficiently to maintain the safety of the environment, wildlife and water supplies and resources. The plan also identifies procedures to be followed during an emergency, such as a spill or discharge, as well as contact information for those who would need to be notified in the event of an emergency.

Finally, an Operating Record is included that provides all forms and information that must be maintained by the facility to show compliance with ODA's rules and the permit. These records document inspection of the manure storage structures, groundwater sampling, manure characterization, land application, insect and rodent control, distribution and utilization of manure, and mortality management. The facility and its records are regularly inspected by the ODA to ensure compliance.

Ms. Willett:

Thank you for your assistance. Attached is the legal ad that the Department of Agriculture needs run in the Ashland Times-Gazette. This only needs to be run once. Please return to the Ohio Department of Agriculture to my attention a "Proof of Publication" or "Publisher's Affidavit." Either will do, some organizations use one form and other the other form, but either will suffice for our purposes. We just need to be able to prove that the ad was published in your paper on the date specified.

Also, please make the invoice out to the Ohio Department of Agriculture, Division of Livestock Environmental Permitting. If you prefer to email the invoice, you may do so to me and I will ensure that it is sent to the correct individuals at the Department of Agriculture for processing.

Thank you again for your help. If you have any questions, please contact me.

Tuck Farms
Draft Permit to Operate

General overview of the farm

Tuck Farms is an existing swine finishing facility located in Crawford County, Lykens Township, at 7895 Parker Road, Bloomville Ohio in the Sandusky River watershed. The facility is owned and operated by Monte and Sheila Tuck. The facility consists of two existing barns with a total combined design capacity of 2,000 swine weighing more than 55 lbs. Liquid manure is stored in concrete pits under the barn floors. The pits provide a total combined storage capacity of 758,000 gallons, or about 240 days' worth of storage.

Overview of Draft Permit to Operate

This draft Permit to Operate is a renewal and will be valid for a period of 5 years. Within this draft Permit to Operate, a complete manure management plan is provided, which outlines inspections, monitoring, and record keeping requirements. The facility will generate an estimated 1.14 million gallons annually of manure and wash water. The liquid manure will be land applied on 442 acres of nearby crop land to recycle nutrients as a replacement for imported synthetic commercial fertilizers.

An Insect and Rodent Control plan is also required to minimize the presence and negative effects of insects and rodents.

A Mortality Management Plan is required for the disposal of dead livestock. Approved methods of mortality disposal are burying, landfilling, burning, rendering and composting. Tuck Farms will continue to utilize on-site mortality composting as their primary method of disposal.

An Emergency Response Plan is also required to ensure that accidents or emergencies are handled quickly and efficiently to maintain the safety of the environment, wildlife and water supplies.

Finally, an Operating Record is contained in the draft Permit to Operate that includes all forms and information that must be maintained by the facility to show compliance with ODA's rules and the permit. These records include inspection of the manure storage structures, groundwater sampling, manure characterization, insect and rodent control, distribution and utilization of manure, and mortality management. These records are routinely inspected by ODA to ensure compliance.

PUBLIC NOTICE
 Date of Notice: June 4, 2013
 Name and address of applicant:
 Monte and Sheila Tuck,
 7995 Porter Rd., Bloomville, OH

In accordance with OAC rule 901.10-6-01, public notice is hereby given that the Ohio Department of Agriculture (ODA) is accepting comments on a draft Permit to Operate (PTO) for the Tuck, Sheila, Crawford County, Lykens Township, Sandusky, Wyandot County, is renewal for an existing PTO. If a final PTO is issued it would be valid for five-years.

Copies of the draft permit can be reviewed and/or copies may be obtained from the stock at: A.B. Graham Building, 8995 East Main Street, Reynoldsburg, Ohio 43068, (614) 373-1234. Any person may submit written comments and/or request a public meeting. The draft permit must be in writing and shall state the nature of the issues to be raised at the public meeting. Comments and/or public meeting requests must be received by the ODA no later than 5 p.m. July 5, 2013. Comments received after this date will not be considered. A public meeting will be held when required by OAC 901.10-6-01 and held at the place where authorized by OAC and for which persons have a right to provide a written or oral statement for the record at the public meeting. If a meeting is scheduled.

This message and only response to it may constitute a public record and thus may be publicly available to anyone who requests it. (Pub. RTF: June 4, 13M479A11)

Irish Acres Dairy, LLC
Draft Permit to Operate

General overview of the farm

Irish Acres Dairy, LLC is located near Sidney, Ohio, Shelby County, Turtle Creek Township at 11053 State Route 705, in the Upper Great Miami River Watershed. The facility is owned by Irish Acres Dairy, LLC, with members consisting of Michael Hackett, Patrick Fullam, James Gilsenan, John Wogan, Vincent Mc Glew, Gerald Healy, Paddy Dunne and Eddie O'Donnell. Craig Hall is the daily operator at the site. The draft Permit to Operate is a renewal application for the previously issued Permit to Operate, which was valid for a period of 5 years.

The facility has a design capacity of 1,630 mature dairy cows and 100 head of heifers. The liquid manure is stored in three earthen ponds, totaling approximately 16.3 million gallons of storage volume. These structures provide approximately 300 days of storage for manure, including contaminated stormwater.

General overview of the draft Permit to Operate

Within the draft Permit to Operate, a complete manure management plan is provided, which outlines inspections and monitoring that must be completed by the facility. Based on facility records, annual manure production is approximately 13.4 million gallons of liquid manure. Irish Acres Dairy controls approximately 1,300 acres of cropland to apply the dairy's manure. The acreage consists mainly of a rotation of corn grain, corn silage, wheat, alfalfa and soybeans.

An Insect and Rodent Control Plan is required to minimize the presence and negative effects of insects and rodents. Specifics of Irish Acres Dairy insect and rodent control plan can be found in the draft PTO.

A Mortality Management Plan is required for the disposal of dead livestock. Approved methods of disposal are burying, landfilling, burning, rendering and composting. Irish Acres Dairy utilizes a rendering service as their primary method of disposal.

An Emergency Response Plan is required to ensure that emergencies are handled quickly and efficiently to maintain the safety of the environment, wildlife and water supplies and resources.

Finally, an Operating Record is included that provides all forms and information that must be maintained by the facility to show compliance with ODA's rules and the permit. These records include inspection of the manure storage structures, groundwater sampling, manure characterization, land application, insect and rodent control, distribution and utilization of manure, and mortality management. The facility and its records are routinely inspected by the ODA to ensure compliance.

PUBLIC NOTICE

Date of Notice: December 5, 2012

Name and address of applicant: Irish Acres Dairy, LLC 7170 S. 300 W, Berne, IN

In accordance with OAC rule 901:10-6-01, public notice is hereby given that the Ohio Department of Agriculture (ODA) is accepting comments on a draft Permit to Operate (PTO) for Irish Acres Dairy, LLC, 11053 SR 705, Sidney, OH, located in Shelby County, Turtle Creek Township, Upper Miami Watershed. This existing farm has applied for a design capacity of 1630 mature dairy cows. If a final PTO is issued it would be valid for five-years.

Copies of the draft permit can be reviewed and/or copies made at the Division of Livestock Environmental Permitting (DLEP) office at: A.B. Graham Building, 8995 East Main Street, Reynoldsburg, Ohio 43068, (614) 387-0470. Any person may submit written comments and/or request a public meeting on the draft permits. A request for a public meeting must be in writing and shall state the nature of the issues to be raised at the public meeting. Comments and/or public meeting requests must be received by the DLEP office no later than 5 p.m. January 4, 2013. Comments received after this date will not be considered. A public meeting will be held when required by OAC 901:10-6-04(C) and may be held where authorized by OAC 901:10-6-01(D). Persons have a right to provide a written or oral statement for the record at the public meeting, if a meeting is scheduled. - end -

Acheson Poultry
Draft Permit to Operate

General overview of the farm

Acheson Poultry is located in Mercer County, Recovery Township, at 2120 Erastus-Durbin Rd, Fort Recovery, Ohio 45846. It is located in the Upper Wabash watershed. The facility is owned and operated by Michael Acheson. This draft Permit to Operate is a renewal for the previously issued Permit to Operate, which was valid for a period of 5 years.

Overview of Draft Permit to Operate

The facility consists of two existing poultry layer barns with a total combined design capacity of 137,600 birds. Each barn has a concrete pit located below the birds to store the solid manure. The pits provide a total combined manure storage capacity of over 300,000 cubic feet, which is well over a year's worth of storage.

Acheson Poultry produces approximately 1,600 tons of solid manure annually. The manure is distributed off the facility where it is land applied by farmers to recycle the nutrients as an organic alternative to imported commercial synthetic fertilizers.

Within this draft Permit to Operate, a complete manure management plan is provided, which also outlines inspections and monitoring that must be completed by the facility.

An Insect and Rodent Control plan is also required to minimize the presence and negative effects of insects and rodents.

A Mortality Management Plan is required for the disposal of dead livestock. Approved methods of mortality disposal are burying, landfilling, burning, rendering and composting. Acheson Poultry will continue to transport mortality to a landfill as the primary method of disposal.

An Emergency Response Plan is also required to ensure that accidents or emergencies are handled quickly and efficiently to maintain the safety of the environment, wildlife and water supplies.

Finally, an Operating Record is contained in the draft Permit to Operate that includes all forms and information that must be maintained by the facility to show compliance with ODA's rules and the permit. These records include inspection of the manure storage structures, groundwater sampling, manure characterization, insect and rodent control, distribution and utilization of manure, and mortality management. These records are routinely inspected by ODA to ensure compliance.

CJR Poultry & Swine, Inc.
Layer Facility
Draft Permit to Operate Renewal

General overview of the farm

CJR Poultry & Swine, Inc., Layer Facility is located at 4237 Ft. Recovery-Minster Road, St. Henry, OH, 45883 which is in Mercer County, Granville Township, situated in the Upper Wabash Watershed. The facility is owned and operated by CJR Poultry & Swine, Inc. of which Charlie J. Rose and Roger J. Rose are members. The permitted design capacity at the facility is 192,960 laying hens housed in two hi-rise barns with a combined 349,664 cubic feet of available solid manure storage in concrete pits below the birds. This draft Permit to Operate is a renewal for the previously issued Permit to Operate, which was valid for a period of 5 years.

Overview of Draft Permit to Operate

Within the draft Permit to Operate (PTO), a complete Manure Management Plan is provided, which outlines inspections and monitoring that must be completed by the facility. The estimated manure production for the entire facility would be 1,600 tons annually which would be distributed to other farmers for application on crop land as a replacement for commercial, synthetic fertilizer sources

An Insect and Rodent Control Plan is included to minimize the presence and negative effects of insects and rodents. The plan includes methods to control flies, beetles and mice. The plan identifies requirements for regular inspections throughout the buildings for flies, larvae and beetles, as well as daily water leak inspections. The results of regular inspections are used to determine if the facility is required to perform treatment for insect or rodents based on the criteria set forth in the permit.

A Mortality Management Plan is required for disposal of dead livestock. Approved methods of disposal are burying, landfilling, burning, rendering and composting. CJR Poultry & Swine, Inc., Layer Facility uses composting as the primary method of mortality disposal.

An Emergency Response Plan is required to ensure accidents or emergencies are handled quickly and efficiently to maintain the safety of the environment, wildlife and water supplies. In case of an emergency or accident, the names and phone numbers of contact personnel and equipment are listed in the permit.

Finally, an Operating Record is included that provides all forms and information that must be maintained by CJR Poultry & Swine, Inc., Layer Facility to demonstrate compliance with ODA's rules and the permit. These records include inspection of the manure storage structures, manure characterization, land application, insect and rodent control, distribution and utilization of

In accordance with OAC rule 901:10-6-01, public notice is hereby given that the Ohio Department of Agriculture is accepting comments on the draft Permit to Operate (PTO) renewals for the following facilities located in Mercer County: D&T Poultry; Depweg Brothers; J&A Poultry; J&K Boeckman; Joe Siefring; Langenkamp Poultry; MJ Homan Poultry Farms; Muhlenkamp Farms Ltd., Warnock Poultry; and Wuebker Farm. If the final Permits to Operate (PTO) are renewed, they will be valid for five-years.

Copies of any of the draft permit renewals can be reviewed and/or copies made at the Ohio Department of Agriculture, Division of Livestock Environmental Permitting (DLEP) office at: A.B. Graham Building, 8995 East Main Street, Reynoldsburg, Ohio 43068, (614) 387-0470. Any person may submit written comments and/or request a public meeting on any of the draft permits. A request for a public meeting on any of the draft permits must be in writing and shall state the nature of the issues to be raised at the public meeting and identify the draft permit(s) to which the issues are related. Comments and/or public meeting requests must be received by the DLEP office no later than 5 p.m., June 20, 2014. Comments received after this date will not be considered. A public meeting will be held when required by OAC 901:10-6-04(C) and may be held where authorized by OAC 901:10-6-01(D). Persons have a right to provide a written or oral statement for the record at the public meeting, if a meeting is scheduled.

Stark County Poultry Facilities
Draft Permits to Operate

General overview of the farms

There are seven broiler poultry facilities located in Stark County that are very similar. Each of these facilities is applying for a draft Permit to Operate, which is a renewal application for a previously issued Permit to Operate (PTO), which was valid for a period of 5 years.

These seven facilities have 10 barns at each site. Each facility has a total design capacity of 170,000 birds that generate 1050 tons of solid manure each year.

General overview of the draft Permits

The chart below provides the general information for each permit application.

Facility Name	Design Capacity	County	Facility Address	Watershed	Owner/ Operator
Alberta Beach Farm LLC	170,000 broilers	Stark	8276 Alberta Beach Rd. N.E., Louisville, OH 44641	Tuscarawas River	Alberta Beach, LLC; The James A. Pastore, Sr., Children's Company, LLC
CAP Farm, LLC	170,000 broilers	Stark	8110 St. Peters Church Rd., Louisville, OH 44641	Tuscarawas River	CAP Farm, LLC
LK Poultry, Inc.	170,000 broilers	Stark	6135 Union Ave. N.E., Alliance, OH 44601	Mahoning River	LK Poultry, Inc.
North Preston Farm, LLC	170,000 broilers	Stark	9635 Ravenna Rd., Louisville, OH 44641	Tuscarawas River	North Preston Farm, LLC; The James A. Pastore, Sr., Children's Company, LLC
Sam's Farm, LLC	170,000 broilers	Stark	8881 Beeson East, Louisville, Ohio 44641	Tuscarawas River	Sam's Farm, LLC
Tess' Farm, LLC	170,000 broilers	Stark	11480 Reeder Rd, Alliance, OH 44601	Mahoning River	Tess' Farm, LLC
West Beeson Farm, LLC	170,000 broilers	Stark	8187 Beeson West, Louisville, OH 44641	Tuscarawas River	West Beeson Farm, LLC; The James A. Pastore, Sr., Children's Company, LLC

Within each draft Permit to Operate, a complete manure management plan is provided, which outlines inspections and monitoring that must be completed by the facility and how manure will be managed. All of the manure generated at each facility will be distributed off site to be utilized by crop farmers to recycle the nutrients as an organic alternative to imported commercial synthetic fertilizers.

A detailed Insect and Rodent Control Plan is required to minimize the presence and negative effects of insects and rodents.

A Mortality Management Plan is required for the disposal of dead livestock. Approved methods of disposal are burying, landfilling, burning, rendering and composting. At each of these facilities, mortalities will be rendered.

An Emergency Response Plan is required to ensure that emergencies are handled quickly and efficiently to maintain the safety of the environment, wildlife and water supplies and resources.

Finally, an Operating Record is included that provides all forms and information that must be maintained by the facility to show compliance with ODA's rules and the permit. These records document inspection of the manure storage structures, groundwater sampling, manure characterization, insect and rodent control, distribution and utilization of manure, and mortality management. The facility and its records are inspected by ODA to ensure compliance.
